## Find the solution you need!

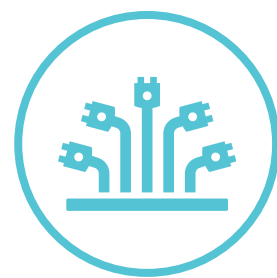

Specialty products

Video surveillance

Control and automation BMS

IT & Connectivity

Intrusion systems

Access control

Detection and suppression

## ■ Featured solutions

**ISTC** offers a large portfolio with the most representative brands in the world, with which any type of solution can be offered for the hotel sector, such as telecommunications infrastructure, parking systems, audio system, digital signage, electronic security, among others.

### > Telecommunications infrastructure:

- Structured cabling
- XGS-PON solutions
- Radio links
- Optical fiber
- Active teams
- IoT solutions
- UPS

### > Photovoltaic energy systems:

- Solar panels
- Electrical distribution management system

### > Parking systems:

- LPR plate recognition
- Guided parking management
- Vehicle location systems

### > Audio systems:

- Ambient audio system
- Message zoning

### > Digital signage:

- Large format screens
- Trade screens
- Video Walls

**ISTC** provides reliable and complete solutions for the needs and challenges of the Hotel sector, this industry is not only in evolution but also requires guaranteeing favorable security conditions which are subject to the latest updates, allowing you to protect your physical integrity, assets and data.

### > **Electronic security:**

- Video surveillance
- Access critical areas
- Access systems for rooms and FrontDesk
- Thermal cameras
- Access control
- Software
- Video Walls
- Intrusion systems
- Audio and video management
- Fire (detection, suppression, aspiration systems)
- Artificial intelligence
- Control and automation
- Electrical cabinets
- Locks

### > **IoT Systems:**

- Humidity sensors
- Thermometers
- Comfort management

### > **Specialized systems:**

- Automatic doors
- Vehicle barriers
- Parking solutions
- Monitoring rooms
- Videoconferences
- Servers and storage

# Building Management Systems (BMS)

A BMS or Building Management System allows the automation and centralized control of buildings to turn them into true "intelligent buildings".

## Advantage (BMS):

It allows centralized control and supervision of all elements of the building. It facilitates the rapid detection of incidents for preventive maintenance. Automating monitoring tasks increases staff productivity. Provides detailed consumption information that promotes energy efficiency. The improvement of the management increases the comfort and security of the users of the building.

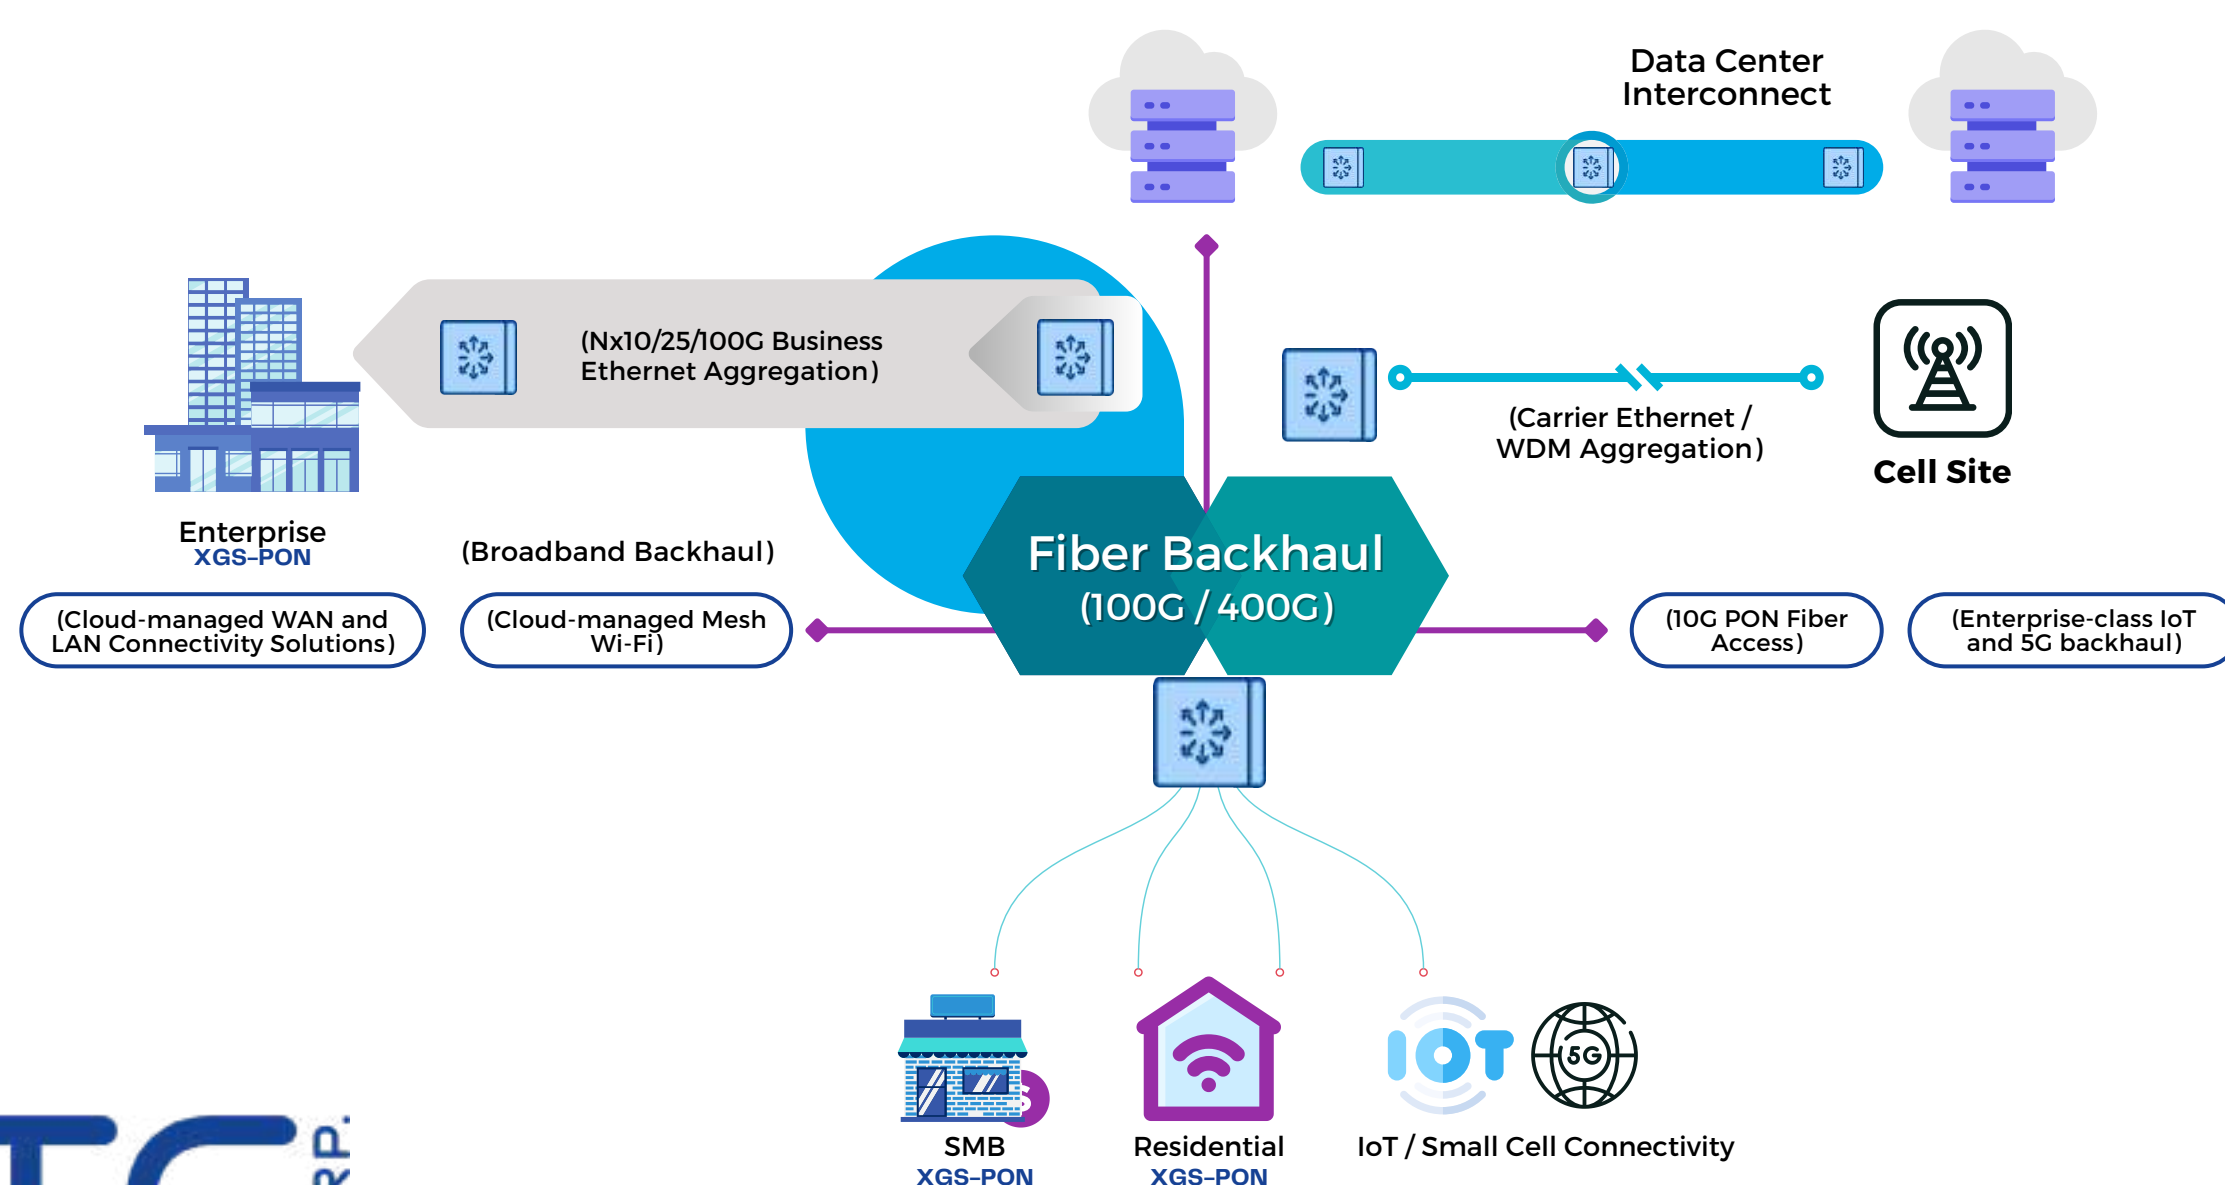

## Featured Solutions:

- Native Integration
- Systems interoperability
- Integrations in unibrand and multibrand solutions

# Passive Optical Networks (XGS-PON)

A great challenge in telecommunications networks is to build an optimal and reliable medium, for this **ISTC** offers DWDM and XGS-PON solutions; of which we have had great success stories in the region. From there we guarantee high bandwidth, future growth, inclusion of various technologies, redundancy and long distance coverage.

## Comprehensive Network Security and Synchronization

# Security challenges in HOTELS

80%

- Of the use of **focused technology** improves guest peace of mind and confidence.

- Currently, we seek to comply with and exceed the hotel's operating **regulations and guidelines**.

70%

- Hotels seek to maintain the same operating capacity and **energy savings**.
