BUSINESS VERTICALS

GUIDE TO RELIABLE AND
SECURE SOLUTIONS

ISTC CORP.

We are experts!

ISTC has comprehensive solutions to cover project needs in the Retail sector, covering Electronic security, Building Automation, Video analytics, Fire detection and Extinction systems, among others, which allows operational efficiency in the field of security.
We have a robust product portfolio which allows us to supply innovative security, automation and connectivity solutions for Latin America and the Caribbean.
ISTC supplies complete solutions and integral services for projects, automating the operation and security processes with the latest technology, in response to the client's needs.

Featured solutions

ISTC offers a large portfolio with the most representative brands in the world, with which you can access any type of solution for the retail sector such as: Telecommunications infrastructure, Parking systems, Audio system, Digital signage, Electronic security, Building Management System (BMS), IoT systems, among others.

Telecommunications infrastructure:

- Structured cabling
- XGS-PON solutions
- Radio links
- Optical fiber
- IoT solutions
- UPS

Photovoltaic energy systems:

- Solar panels
- Electrical distribution management system

Parking systems:

- LPR plate recognition
- Guided parking management
- Vehicle location systems

Audio system:

- Environmental audio system
- Message zoning

Digital signage:

- Large format screens
- Screens for retail
- Video Walls

Specialized systems:

- Automatic doors
- Vehicle barriers
- Monitoring rooms
- Servers and storage

Servers and Storage:

- Storage
- Servers

Retail doors

ISTC supplies a complete range of solutions for excellent pedestrian doors for the Retail vertical, which are adaptable to different infrastructures, easy to install and with aesthetic solutions that are integrated into all types of furniture.

Electronic security:

- Video surveillance
- Thermal cameras
- Access control
- Software
- Video Walls
- Intrusion systems
- Audio and video management
- Fire (detection, suppression, aspiration systems)
- Artificial intelligence
- Control and automation

IoT Systems:

- Humidity sensors
- Thermometers
- Comfort management
People and asset management:

- Loss prevention
- Shift management

Specialized analytics:

- Specialized analytics hot zones
- People counting
- People flow analysis

Personal access security:

- Metal detectors
- Specialized video surveillance

Functionality

Operability

Benefits

Building Managment Systems (BMS)

A BMS or Building Management System allows the automation and centralized control of buildings to turn them into true "intelligent buildings".

Advantage (BMS):

It allows centralized control and supervision of all elements of the building It facilitates the rapid detection of incidents for preventive maintenance Automating monitoring tasks increases staff productivity Provides detailed consumption information that promotes energy efficiency The improvement of the management increases the comfort and security of the users of the building
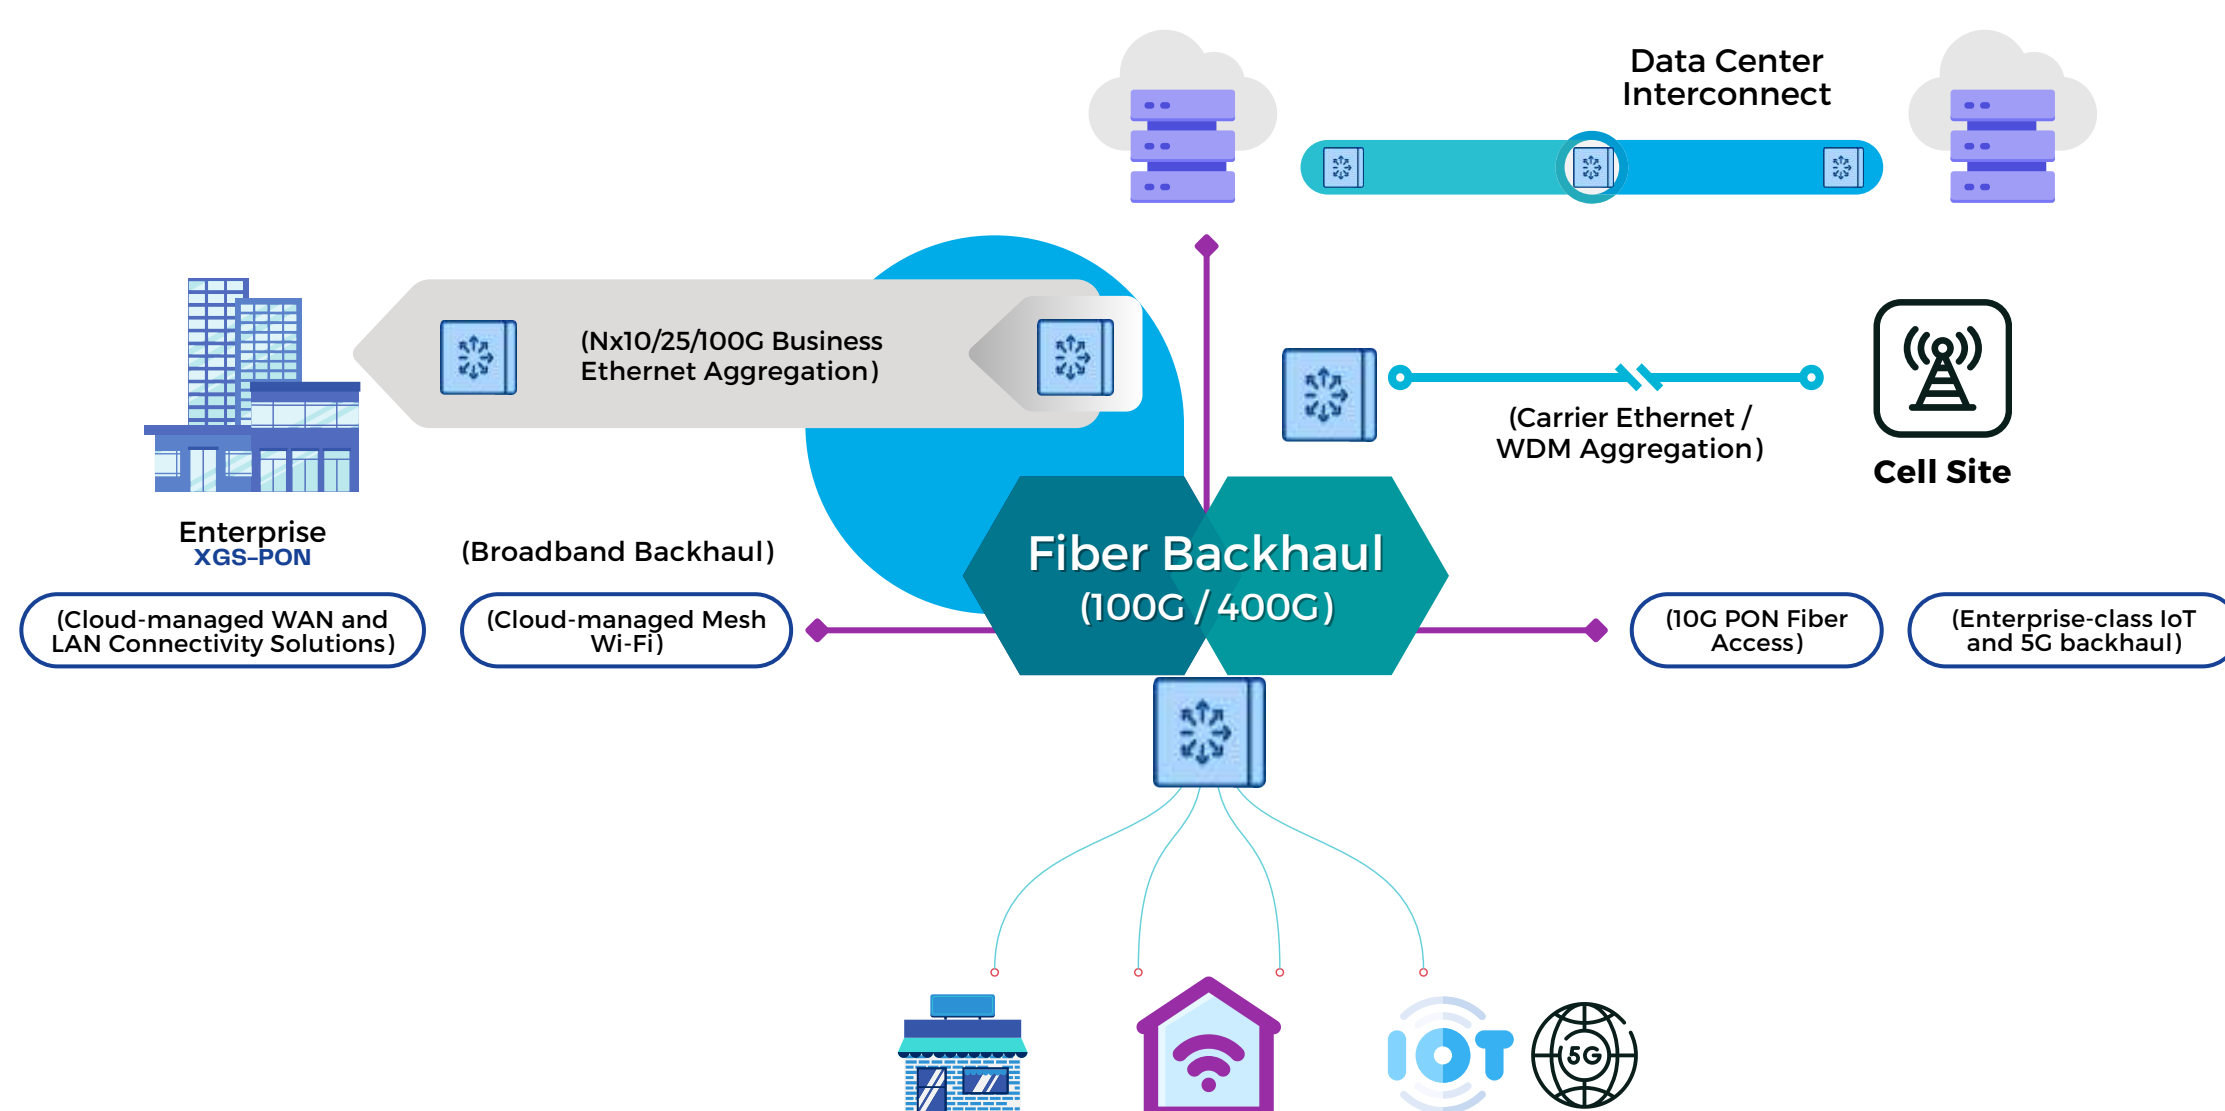

Featured Solutions:

- Native Integration
- Systems interoperability
- Integrations in unibrand and multibrand solutions

Passive Optical Networks (XGS–PON)

A great challenge in telecommunications networks is to build an optimal and reliable medium, for this **ISTC** offers DWDM and XGS-PON solutions; of which we have had great success stories in the region. From there we guarantee high bandwidth, future growth, inclusion of various technologies, redundancy and long distance coverage.

Comprehensive Network Security and Synchronization
Security challenges in RETAIL

91%

· Of retailers see a higher number of **attacks**.

26%

· Of retailers can stop a **ransomware** attack.

73%

· Say **AI** will be crucial to future security challenges.
