Intrusion systems

Access control

Detection and suppression

■ Featured solutions

ISTC offers a large portfolio with the most representative brands in the world, with which any type of solution can be offered for the Banking sector, such as shift Management system, Audio system, Digital signage, Telecommunications infrastructure, Electronic security, among others.

Shift management systems:

- Centralized customer management
- Queue automation
- Control of centralized files
- Customer comfort metrics and operation of the establishment and employees

Audio system:

- Ambient audio system
- Message zoning

People and asset management:

- Loss prevention
- Shift management

Digital signage:

- Large format screens
- Video Walls

Telecommunications infrastructure:

- Structured cabling
- XGS-PON solutions
- Radio links
- Optical fiber
- Active teams
- Power backup system
- IoT solutions

Smart banking solutions

Online banking has added great value to the customer experience, by which a digital movement can be generated without the massive overhead, with the digital branch transformation solutions, Smart Digital Branch, Self-service kiosks, Video banking machine among others.

> Electronic security:

- Video surveillance
- Thermal cameras
- Access control
- Software
- Video Walls
- Intrusion systems
- Audio and video management
- Fire (detection, suppression, aspiration systems)
- High level analytics
- Artificial intelligence
- Control and automation

> Specialized systems:

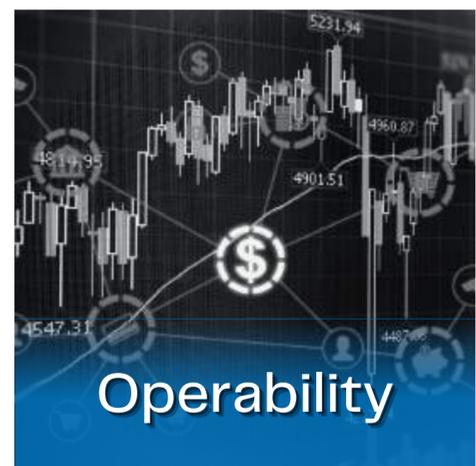

- Large format screens
- Monitors
- Automatic doors
- Vehicle barriers
- Parking solutions
- Monitoring rooms
- Videoconferences
- Work stations
- Intercoms

> Servers and storage:

- Storage
- Servers and workstations

> Photovoltaic energy systems:

- Solar panels
- Electrical distribution management system

Building Management Systems (BMS)

A BMS or Building Management System allows the automation and centralized control of buildings to turn them into true "intelligent buildings".

Advantage (BMS):

It allows centralized control and supervision of all elements of the building. It facilitates the rapid detection of incidents for preventive maintenance. Automating monitoring tasks increases staff productivity. Provides detailed consumption information that promotes energy efficiency. The improvement of the management increases the comfort and security of the users of the building.

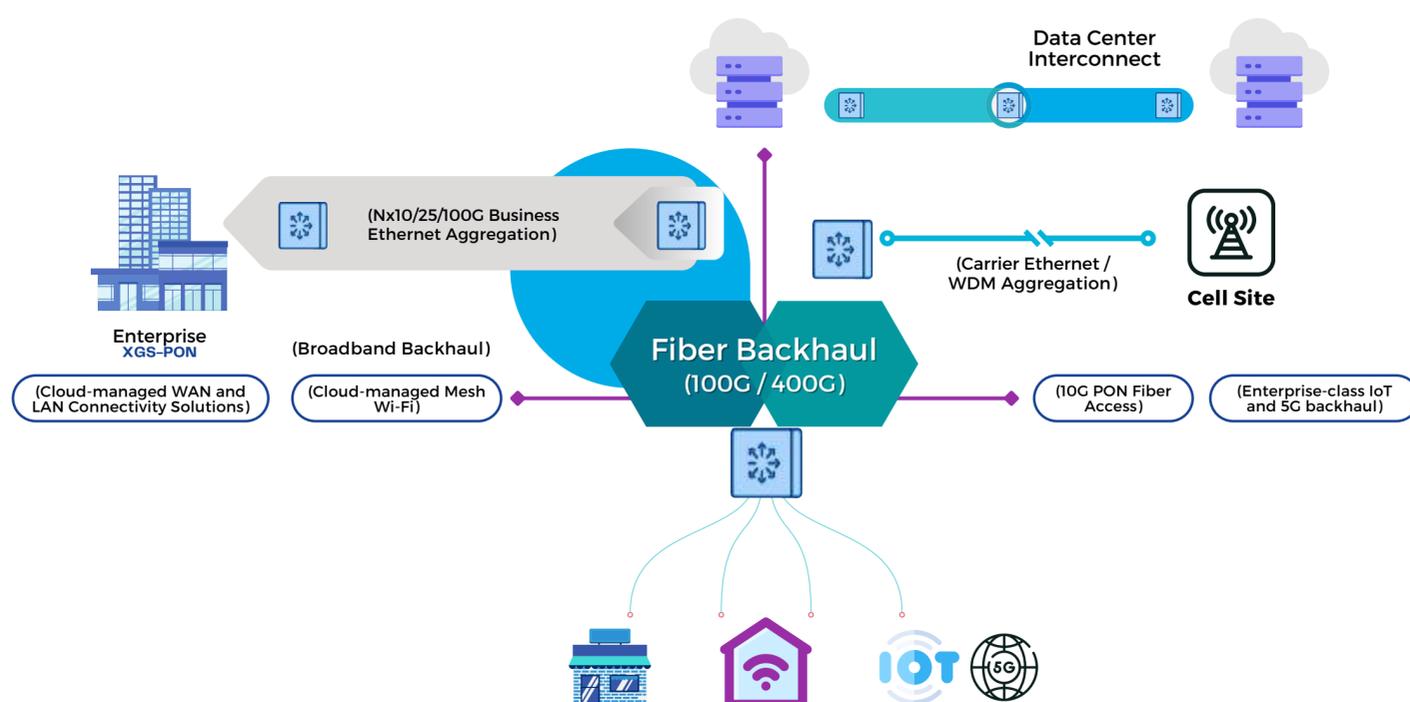

Featured Solutions:

- Native Integration
- Systems interoperability
- Integrations in unibrand and multibrand solutions

Passive Optical Networks (XGS-PON)

A great challenge in telecommunications networks is to build an optimal and reliable medium, for this **ISTC** offers DWDM and XGS-PON solutions; of which we have had great success stories in the region. From there we guarantee high bandwidth, future growth, inclusion of various technologies, redundancy and long distance coverage.

Comprehensive Network Security and Synchronization

Security challenges in **BANKING**

· Having a **surveillance system** is the appropriate solution so that there are no risks of theft and vandalism.

35% · Of users feel safe using **online banking** or **digital wallets**.

· Risks are minimized using **electronic security systems**.
